The Options Process

This booklet contains all of the information students need to select their GCSE options. In the booklet they will find information on:

- How the process works.
- The timeline.
- How to apply for their options.
- The different subjects available.

Upon receiving this booklet, students will have had an options assembly from Mr Cooper and Miss Grimmer setting out the process and the options passport. As part of the options process, we aim to give all students a breadth of knowledge and support, providing:

- Dedicated form time sessions looking at options choices and career pathways.
- PSHE lessons where they will be taught how to seek advice and given guidance around choosing their options.
- Form time which will continue to offer support around options choices.
- Lunchtime drop-in sessions with various support organisations and the year 9 options team.
- Ongoing assemblies and taster sessions on new option subjects and pathways.
- 1:1 progress meetings for students with key staff.

Selecting options is an important part of the KS4 process. When choosing subjects students should seek advice from a range of people including their subject teachers, form tutor, the SEN team (if relevant), parents/carers and any careers advice needed from Mrs Richings and websites (see page 8 of this booklet).

This is an opportunity for students to explore their interests, prepare for their future and explore potential study paths and careers that are their ticket to the next stage in their life. Students should pick subjects based on their interests and passions, and think about how they can use that subject in the future. KS4 taster sessions will give students an idea of where the subject can take them in the future.

Once students have completed their Options Passport, which details all the steps they have completed to ensure they have engaged in thoughtful reflection throughout the process, we will also arrange for them to have an interview with a member of staff about their option requests to check they have made appropriate choices.

We will attempt to accommodate all requests; however certain combinations are not viable and subjects are dependent on availability and option blocks, so may not be possible.

Following the Easter holidays, the academy will arrange the options groups. Where possible we will endeavour to give students their first choice in each option block. However, please bear in mind that there are limits on specialist staff availability and specialist classrooms that may limit numbers on certain courses. Equally, if there is a lack of student interest then a course may not run. Students will be informed of their options after the May half term holiday.

Students must make sure they read this booklet thoroughly with their parents/carers and make informed decisions about their future.

The Options Process

Who should students ask for help?

Who can help students with careers?

Mrs Richings and Mrs Gibbons in the careers office will support students with information regarding careers:

jrichings@ormistonden.es.co.uk or mgibbons@ormistonden.es.co.uk

Who should students ask about the course they want to take?

Students should ask the subject leader (found on each subject page) or their class teacher for that subject.

Who should students ask for more information about the options process?

Students can ask their form tutor or Miss Arnold: marnold@ormistonden.es.co.uk

Options Timeline

1. We will launch the options process in school during the spring term, this will be through an assembly with the year team and during the Year 9 Parents'/Options Evening.
2. Following this assembly, students will receive their personal copy of the options booklet in form the following week. Once students have received this, they will participate in a range of activities to get to know all the different courses on offer.
3. After the February half term, we will run a series of workshops in some lessons where students will experience some of the options subjects not on offer at KS3.
4. Once students have completed their Options Passport (in their options booklet) which details all the steps students have completed to ensure they have engaged in thoughtful reflection throughout the process, students will need to meet with a member of the Year 9 team or SLT to submit their options requests by the **Monday 24th March 2025**
5. Following the Easter holidays, the academy will arrange the options groups. Students will be informed of their options after the May half term holiday.

Curriculum Choices

At Ormiston Denes Academy, we are passionate about ensuring students leave us having fulfilled their potential in a broad range of subjects and have the opportunity to **succeed at the highest level**. As such, the curriculum we offer gives the balance of a wide curriculum base in KS3 before allowing students to specialise in the subjects they enjoy the most in Year 10. PSHE, RE and PE are ingrained throughout the five year curriculum.

Key Stage 4 courses require a considerable amount of commitment of all aspects of study both in school and at home. It is therefore important to be fully aware of the expectations of each course when making a choice.

All students will need to select their choices for the courses they will study throughout the whole of Year 10 and Year 11. Each student will study:

- The core curriculum.
- Three options subjects which include:
 - a. A minimum of one subject from the EBacc options.
 - b. Two choices from the remaining options

Core Curriculum (hours per fortnight)	
English Language & Literature (10)	Non-Examined
Mathematics (8)	Physical Education (4)
Combined Science (8)	PSHE/Religious Education (2)

All Options (6 hours per fortnight)			
	Option 1	Option 2	Option 3
Students must chose at least one subject from the Ebacc subjects across one of the Option blocks. If students wish to take the full Ebacc, they must choose a language as well as either	Geography	Geography	Geography
	History	History	History
	French	Spanish	German
			Computer Science
	Art**	Graphics**	Photography**
	Sports Studies	Sports Studies	Art**
	Health & Social Care	Religious Education	Health & Social Care
	Hospitality & Catering	Hospitality & Catering	Travel & Tourism
	Performing Arts : Dance *	Performing Arts: Music*	

*Can my child take both Music and Dance?

Unfortunately, they are separate pathways of the same Performing Arts BTEC award—they **cannot** be selected together.

** Can my child take Graphics and Photography and/or Art?

Again, the subjects are separate pathways of the same GCSE Art & Design course—they **cannot** be selected together.

*** Can my child take BTEC if they don't play a musical instrument?

To be successful on the course, students need to play a musical instrument with proficiency as performance is a main component of the assessment. All options preferences will be checked by the Head of Music.

The English Baccalaureate

In November 2010 the Department for Education launched the government's 'The Importance of Teaching – The Schools White Paper 2010'. This document set out the future strategic vision for education in this country and one key aspect of this vision was the introduction of a new certification for students at 16 years called the 'English Baccalaureate.' This is not a qualification, but recognition of students attaining the set of requirements.

The English Baccalaureate is designed to encourage schools to offer a broad set of academic subjects and recognises students who secure good GCSE passes in English, mathematics, the sciences, a modern or ancient foreign language and a humanity, such as history or geography.

According to the DFE's website:

The EBacc is made up of the subjects which are considered essential to many degrees and open up lots of doors.

Research shows that a pupil's socio-economic background impacts the subjects they choose at GCSE, and that this determines their opportunities beyond school.

- A study by the UCL Institute of Education shows that studying subjects included in the EBacc provides students with greater opportunities in further education and increases the likelihood that a pupil will stay on in full-time education.
- Sutton Trust research reveals that studying the EBacc can help improve a young person's performance in English and maths.

Our view on the English Baccalaureate

At Ormiston Denes Academy, we recognise that the English Baccalaureate is an important part of students' progression to higher education and have ensured our curriculum provides the opportunity to achieve this qualification set. However, we will ensure that the curriculum suits the needs of all students and offers a personalised curriculum enabling them to achieve success.

We also want to give all students access to a broad and balanced curriculum. We continue to value creative and technical subjects and have ensured our curriculum continues to allow opportunities for students to develop a wide range of interests and talents. We remain committed to enabling a range of clubs and opportunities for those who choose not to pursue creative options at KS4 but have an interest in these that they wish to continue to develop.

Careers Information

Thinking about careers that interest them is an effective way to help students select their options preferences.

Careers staff in the academy are here to support students when making important choices about their future career.

What steps can they take to find out more about careers?

- Following their PSHE options lesson, students should complete the 'Making good GCSE choices' booklet.
- Arrange to talk to staff who know them well about their careers choices.
- Book a 1 to 1 careers guidance appointment with Mrs Gibbons, by speaking to Mrs Richings in the careers office, or by emailing jrichings@ormistonden.co.uk.
- Look at resources in the careers guidance section of our website, found under the 'For Students' tab.
- Make the most of the 'Support with Options' lunchtime drop in's that will be available to students during the options process. Details will be emailed to students, and also placed on Daily Messages.
- Remember the 'good' and 'bad' reasons for choosing their options, as detailed in the option assembly (and shown below)
- Use the online resources (on the next page) to support your research and options choices.
- Look regularly on the Student Launchpad, there will be options information to support you.
- Think about what skills each subject can also enhance.

Good reasons for choosing options

- They are good at the subject.
- They think they will enjoy the subject.
- It fits their career ideas and plans.
- It compliments their other choices.
- It helps give them plenty of choice post 16.
- They think they might want to continue studying it post 16.
- They have researched it fully.

Bad reasons for choosing options

- Because their friends have chosen it too.
- They think it will be easy.
- Someone else thinks it is a good idea.
- They like the subject teacher.
- They don't like the subject teacher!
- They haven't researched properly.
- They haven't considered all options.

Local Labour Market Information (LMI)

Finding reliable information about the local and national labour market allows students to find out information about jobs and career paths and changes in the world of work. It helps to develop new perspectives, gives up to date information around the local area, and can correct misconceptions and stereotypes. The map above shows some of the top employment sectors in Suffolk.

Some key facts:

- New job roles, and new technologies, are being created all the time.
- Some of the biggest companies in the world didn't exist 10 years ago.
- Global competition is increasing.
- People are living longer, which increases the demand on sectors like health and social care.
- The environment needs to be protected, which increases jobs in greener technologies.
- There are over 180 different job roles in the construction & maintenance industry.
- Over 12,000 people are currently employed in the energy sector in Suffolk, and job roles are increasing.
- Suffolk is one of the largest finance & insurance sectors in the UK outside London.
- Health & social care is the 2nd largest employment sector in Suffolk, with over 350 different careers in the NHS alone.
- ICT, Tech and digital creating is expanding 2.6 times faster than the rest of the UK economy, leading to a substantial increase in jobs.
- There are over 27,000 travel & tourism jobs in Suffolk, supporting 26.5 million visitors each year.

The way we work is also changing, the future brings more:

- Flexible hours.
- Fixed term contracts (instead of permanent contracts).
- Remote working has increased.
- Self employment has increased.
- Increases in shift working.

For more information relating to LMI please visit the Careers Guidance section of our website www.ormistondenes.co.uk.

Essential Skills for Learning and Employment

Essential skills unlock learning in the classroom, boosting academic outcomes, perseverance, resilience and self belief. Students have less likelihood of being out of work, and increase earnings across a lifetime. They even boost wellbeing and life satisfaction. As an academy we will work to enhance the skills that students already have, using Skills Builder, a framework of 8 essential skills. These skills are highly transferable, from school to college, university and into the workplace.

The 8 Skills are:

This skill is about being able to effectively receive information, from any verbal source.

This skill is about how to communicate effectively with others, being mindful of whether they are talking to peers, teachers or in other different settings.

This skill focuses on how to solve problems, recognising that whilst part of problem solving is technical know how and experience, there are also transferable skills that individuals can develop and use in the process.

Creativity is the complement to problem solving, and is about generating ideas which can then be honed through the problem solving process.

This skill is all about individuals being equipped to manage their emotions effectively and being able to remain motivated, and ultimately to motivate others, even when facing setbacks.

This skill is about being able to plan effectively - both to achieve organisational goals, and also to set their own personal development targets.

This skill is relevant not only for individuals in a leadership position, but also for individuals working with peers in teams.

This skill applies to working within both formal and informal teams, and also with peers, teachers and

Employability, or transferable, skills, are important as these skills can make you more employable. Employability not only relates to your academic success, but also to knowledge, skills, and attitudes (which in turn includes behaviour and attendance/reliability).

There are often skills tests in an interview process, and employers can see good employability skills as important as academic achievement.

For more information see: www.skillsbuilder.org

ENGLISH LANGUAGE

Course Description

Students use Year 9 to build their skills across all elements of English. They are encouraged to develop their ability to write for different audiences and purposes, as well as to interrogate language that they encounter in a range of genres. They begin the GCSE English Language course at the beginning of Year 10 and, over the next two years, follow a practical course which develops their skills in reading, writing and speaking and listening. Students follow the new AQA GCSE syllabus that builds upon the skills they developed in Key Stage 3. This course is 100% examination at the end of Year 11, but students will complete exam style assessments each half term to hone their examination technique.

Assessment type. 100% examination

1. Reading

Students will be expected to read and respond to a variety of text types and will develop their ability to:

- Select and retrieve relevant information.
- Demonstrate an understanding of implicit and explicit meanings.
- Evaluate the effectiveness of a text.
- Comment on the techniques employed by the writer and consider their effect on the reader.

2. Writing

Students will produce a variety of written assessments that will demonstrate their ability to:

- Write appropriately for form, audience and context.
- Use linguistic techniques to engage and influence the reader.
- Spell and punctuate accurately and for effect.
- Produce coherent and well-structured responses

3. Non Examination Assessment: Speaking and Listening

Students will be expected to:

- Present.
- Respond to questions and feedback.
- Use standard English.

Where Does it Lead?

As a core subject, English offers a pathway into the worlds of work and further study. If students wish to pursue a post-16 vocational college course, a grade 5 in English Language will put students ahead of the field. It is likely that any future employer will also want a grade 5 as evidence of their written and oral skills. The written communication and spoken communication skills taught in English are essential to most job roles in the modern economy. If students are pursuing A level studies with a view to going on to university or into a profession, both English Literature and Language are highly valued and are useful for a number of careers in fields such as education, law and journalism. In fact, there are very few courses in which an English qualification is not beneficial.

Course Description

In Year 9, students are encouraged to read and analyse a range of challenging texts, whilst building their ability to identify key features and explore their significance.

Throughout Years 10 and 11, students will study a number of classic and modern texts which include:

- A collection of modern poetry from the AQA Poetry Anthology.
- A modern text (An Inspector Calls by J.B. Priestley).
- A Shakespeare text (Macbeth).
- A 19th Century novel (A Christmas Carol by Charles Dickens).

Students will study all texts in Years 10 and 11. In the first year, they will secure their understanding of plot, character and themes. This course is 100% examination and, to prepare students for this, they will be assessed at the end of each unit through an exam style question. In Year 11, students will briefly revise the content of the texts but the teaching will focus mainly on exam technique, and students will be provided with multiple opportunities to plan, write and assess exam responses. This is crucial as the English Literature exam is closed book. This means that students will not have access to any of the texts they have studied in class and will be required to answer exam responses on them from memory.

Assessment type

This course is 100% examination and, to prepare students for this, they will be assessed at the end of each half term through an exam style question.

Students will explore:

- Relationships between characters.
- How setting and atmosphere are created and contribute to the overall effectiveness of the text.
- Links between texts (particularly poetry).
- The presentation and development of themes.
- The significance of the social and historical context to the text.
- How form, language and structure contribute to meaning.
- How the writer achieves specific effects and how these are received by the reader.
- How ideas are presented in an extract and then developed in the rest of the text.

Where Does it Lead?

If students are pursuing A Level studies with a view to going on to university or into a profession, both English literature and language are highly valued and are useful for a number of careers in fields such as education, law and journalism. In fact there are very few courses where an English qualification is not beneficial.

COMBINED SCIENCE

Course Description

GCSE Combined Science (Trilogy) is a double GCSE taken by the majority of students. It builds on the Key Stage 3 curriculum and covers the National Curriculum Programme of Study for Science at Key Stage 4. It encourages students to explore, explain, theorise and model in science and develops a critical approach to scientific evidence.

Double award covers the biology, chemistry and physics branches of science. More details including the specification for GCSE Combined Science (Trilogy) is available at: <http://www.aqa.org.uk/subjects/science/gcse>

Assessment type

The Combined Science GCSE is examined by six 1 hour 15 minute written exams, each of which is worth 16.7% of the final grade. There are two exams on each subject biology, chemistry and physics. There are 21 required practicals that are delivered throughout the course. There will be questions relating to these practicals on the written exam papers.

Science is a subject but it's also a way of thinking: science students have been trained to think critically, research properly and be guided by the evidence. These are critical workplace skills and employers value the creativity and problem-solving skills of science.

We often tend to think of science as the three subjects Biology, Chemistry and Physics – but astronomy, engineering, genetics, geology, maths, medicine, nanotechnology, nursing, pharmacology, veterinary and zoology are also among the third-level science options.

Science never stays still, and jobs that were unimaginable 20 years ago are now thriving, with so many opportunities available to work in areas as diverse as biotechnology, data analysis, drones, nanotechnology, smart devices and so much more.

Some students will go on to work in labs, academia or industry. Others will choose further study before going on to specialise in a particular area.

Where Does it Lead?

GCSE Core Science gives students a good grounding in science. Success in combined science can provide access to AS/A2 science courses, including applied science and psychology. In the long term, if students decide to pursue their scientific studies, it can lead to an almost limitless number of job opportunities. Highly qualified scientists are very much in demand and their skills are required in many jobs.

Physical Education (Non examined)

Core Curriculum

Course Description

Students will continue their programme of study across a variety of sports and activities. The central aim is to increase students' awareness of health and fitness issues, safe participation in sport, competitive and co-operative sporting opportunities and the development of personal and social skills (My Personal Best).

The activities students will take part in are from the following;

- Trampolining.
- Dance.
- Team games.
- Racket sports.
- Striking and fielding games.
- Personal health and fitness.

Benefits of Physical Education

It is no secret that physical activity is necessary to a person's well-being. Because children are continuously developing, both physically and emotionally, they are especially affected by the benefits of activity, and inversely, the negative effects of inactivity.

The main benefits of physical education:

Improved health and fitness

- Improves self-confidence.
- Improves team work.
- Improves social skills.
- Improves leadership skills.

This is a non examined course.

PSHE & RELIGIOUS EDUCATION

Course Description

The personal, social, health education/ religious education course builds on Key Stage 3 topics to help students confidently develop a more nuanced understanding of relationships and sex, religion and beliefs, drugs and substance misuse, careers and finance. Students follow a programme in which they will cover both statutory requirements and non-statutory topics following a thematic approach. Sex and relationship education is embedded within the programme of study to help and support young people through their physical, emotional and moral development. This aims to help young people learn to respect themselves and others and move with confidence from childhood through adolescence into adulthood.

The personal and social health education (PSHE) and religious education curriculums are designed in a way to support young people in:

- Becoming confident individuals who are physically, emotionally and socially healthy.
- Being responsible citizens who make a positive contribution to society.
- Understand and manage risk.
- Recognise personal wellbeing and embrace change.

Students will learn by:

- Contributing in class discussions and role plays with their own points of view and responding to others.
- Visits from guest speakers.
- Self-reflection to recognise strengths and weaknesses in their personal, social, health and economic development.
- Taking an interest in current affairs both locally and nationally by watching the news or reading articles.
- Making use of ICT and the internet for simulations and to carry out research.

Assessment type - these are non examined courses.

In PSHE/RE there is no external assessment. Their knowledge will be assessed in each lesson and guide the level of depth the teacher will take the learning. Their overall progress will be assessed each unit. cycle, with a specific assessment related to the content covered.

Where Does it Lead?

The study of PSHE/RE will help students gain the confidence to participate in communities in a positive manner and become an active citizen. As this subject develops their communication and self-reflection skills it creates a strong basis for all careers. The content of this course will develop their skills and knowledge needed in the world of work and beyond.

For further information, the Relationship and Sex Education (RSE) and Health Education policy can be found in the policy section of our academy website.

GCSE Modern Foreign Languages

(French, German, Spanish) EBacc. Subject

MODERN FOREIGN LANGUAGES

Course Description

Over the course of the GCSE, students will develop their listening, speaking, reading and writing skills in their chosen language, studying modules on the themes of studying and my future, my personal world, media and technology, lifestyle and wellbeing, my neighbourhood and travel and tourism. These will be examined with four assessments in Year 11.

Aside from the vocabulary and grammar needed to pursue their language at this higher level, students will also learn more about the countries where these languages are spoken and develop their communication skills and cultural awareness.

A GCSE in French, German or Spanish will provide students with the means to appreciate different countries, cultures, communities and people while also giving students a qualification respected by employers, sixth forms and universities.

Assessment type

The French, German and Spanish GCSEs consist of four exams: listening, speaking, reading and writing, worth 25% each. The speaking exam is carried out by their class teacher and will involve students having a conversation with them which is recorded and sent away for grading.

Where Does it Lead

Students with strong language skills stand out in a competitive job market. Having a language GCSE also means that students will be able to pick up other languages such as Japanese, Korean and Russian at a later date. Students will also be able to demonstrate that they can communicate with people across cultures and languages and be in a strong position to get a job in companies with international links, or even work abroad.

Languages also have lots of transferable skills that show future employers students can rise to a challenge and step out of their comfort zone, including: translation, interpreting, journalism, travel and tourism, IT, marketing, banking, sales and teaching.

Why Study languages?

Languages open up new opportunities for work and leisure abroad and change the way students see the world.

French, German and Spanish are challenging but rewarding GCSE options which will stand students in good stead to continue with any academic pathway in their future as they also combine well with subjects like law, business and politics.

KS4 topics will deepen their existing linguistic knowledge to tackle more complex topics like what we should do about climate change to explaining why somebody is their hero. They will also learn to master functional language like ordering food, booking hotel rooms, speaking to tour companies and explaining illness and accidents with medical professionals.

Options Process Pull Out Section

Ormiston Denes Academy Options Passport 2024

Name: _____

Tutor Group: _____

To ensure students have considered carefully the courses they wish to take at GCSE, they will need to confirm they have completed the following activities and the relevant member of staff has signed to confirm their participation.

Activity	Date	Signed
Attended Parents'/Options Evening		Any teacher:
Received Options Booklet		Options staff:
Viewed option subject stands		Options staff:
Attended the options assemblies		Form tutor:
Completed their PHSE lessons on careers.		Teacher:
Spoken to the class teacher leading the option subjects chosen.		Option 1: Option 2:
Spoken to their parents about the choices they have made.		Parent:
Experienced the taster sessions.		Session 1: Session 2:
Completed form time session 1.		Teacher:
Completed form time session 2.		Teacher:
Completed form time session 3.		Teacher:
Participated in a pathways meeting with a member of the Year 9 team.		Year 9 team:

How to Choose Their Subjects

1. Research

- Read about all the courses that students could choose from in this booklet.
- Explore careers and what qualifications students will need.

Students can start with <https://nationalcareersservice.direct.gov.uk/> where they can chat online to an impartial careers advisor.

Students should think about:

- Which subjects particularly interest them.
- Where do their strengths and weaknesses lie?
- What study skills might they need for some subjects?
- Which subjects do their teachers recommend that they take?
- What ideas about their future career do they have at present?

2. Deciding

When students have gathered all their information and discussed their thoughts with their parents/carer, their form tutor and the appropriate staff, students are ready to make their decision.

Tips: Some subjects may have special requirements: e.g. hospitality and catering - students will need ingredients. Performing arts - students may need to take part in rehearsals and performances outside of the academy day and will need to perform in front of their peers and larger audiences.

Students shouldn't choose a subject just because they like the teacher: it may be that they will not have the same teacher next year. Likewise, they should not be put off a subject because they do not get on well with their present teacher.

Make your own choices; don't just follow a friend.

3. Preferences

We ask students to select preferences; we will use this information alongside their current grades and discussion with their teachers to place them in suitable subjects to help them achieve their best.

Using the option blocks below, students should list their preferences for each option block below.

They should list at least three:

Preference	Option Block 1	Option Block 2	Option Block 3
1st			
2nd			
3rd			
4th			
5th			
6th			

Course Description

Introduction

Students will travel the world from the classroom, exploring case studies in the United Kingdom (UK), newly emerging economies (NEEs) and lower income countries (LICs). Topics of study include climate change, poverty, deprivation, global shifts in economic power and the challenge of sustainable resource use. Students are also encouraged to understand their role in society, by considering different viewpoints, values and attitudes. Upon completion of this two year course, students will have the skills and experience to progress onto A-level and beyond.

Assessment type

Paper 1 Living with the Physical Environment:
Externally assessed written exam (35%)

Paper 2 Challenges in the Human Environment:
Externally assessed written exam (35%)

Paper 3 Geographical Applications:
Externally assessed written exam (30%)

Where Does it Lead?

Geography can open the doors to a variety of careers and further education opportunities. The ability to research information from a variety of sources and present to a targeted audience in a variety of ways is a sought after skill base in any career path in this ever changing world. The ability to empathise with a variety of cultures underpins a world view built through investigative study.

Why Study Geography?

Geography helps us to explore and understand space and place - recognising the great differences in cultures, political systems, economies, landscapes and environments across the world, and exploring the links between them. Geography also provides an ideal framework for connecting and bringing together other fields of knowledge.

Geography is, in the broadest sense, an education for life and for living. Learning through geography – whether gained through formal learning or experientially through travel, fieldwork and expeditions – helps us all to be more socially and environmentally sensitive, better informed, and more responsible as citizens and employees.

GCSE History

EBacc. Subject

Course Description

This course covers a wide range of topics that build on learning at KS3 and prepares students for A levels and beyond. On paper 1, students will learn about the development of medicine in the UK from medieval times through to the present day, with a special focus on treatments on the Western Front during the First World War. Students will learn about the key factors that have revolutionised health care. They will then go on to study the American West and Anglo-Saxon England and Norman England, where they will develop their historical writing skills and deepen their understanding of causes and consequences. Then they will apply their skills and knowledge to the study of Weimar Germany and the rise of the Nazis.

Assessment type

GCSE exam (9-1). There are three written exams:

Paper 1: 1 hr 15 minutes (30% of course)

Paper 2: 1 hr 45 mins (40% of course)

Paper 3: 1 hr 20 mins (30 % of course)

Why study History?

History is an important subject, as by studying the past, students gain a better understanding of contemporary culture at home and globally. By analysing arguments and using evidence, students develop critical thinking skills that can be applied to other subjects and later to the world of work. History also develops valuable literacy skills.

Where Does it Lead?

History is a very popular subject at A level and degree level in its own right. A GCSE in history will also help with understanding of other humanities subjects such as geography and religious studies. The skills developed in history overlap with law and so it is a good grounding for legal studies.

Due to the literacy requirements, it is also a good grounding for careers in education, the civil service and the media.

Hospitality and Catering

HOSPITALITY & CATERING

Course Description

This qualification is made up of 2 units.

Unit 1: The Hospitality and Catering Industry

Students will:

- Learn about the hospitality and catering industry, the types of hospitality and catering providers and about working in the industry.
- Learn about health and safety, and food safety in hospitality and catering as well as food related causes of ill health.

Unit 2: Hospitality and Catering in action.

- Learn about the importance of nutrition and how cooking methods can impact nutritional value.
- Learn how to plan nutritious meals as well as factors which affect menu planning. Students will learn the skills and techniques needed to prepare, cook and present dishes as well as learning how to review their work effectively.

Assessment type

Students will be assessed through a written examination and an assignment.

Unit 1 will be assessed through a written exam (1 hour 20) which is worth 40% of their qualification. (work completed in Year 10 (summer term) and Year 11)
Unit 2 - students will complete an assignment where they will plan and prepare a menu in response to a brief. This will be worth 60% of their qualification. (completed in Year 10)

Where Does it Lead?

Related careers include: nutritionists, dieticians, health promotions officers, product development in the food industry, teachers in food technology, catering and nutrition, managers in food retail, food hygiene officers, hospitality and events management. For students who wish to develop their food studies, there are Level 3 courses available in Food or Catering and Hospitality. This could lead to a number of closely related courses in nutrition, food and health, available at various universities and catering colleges.

Why study Hospitality & Catering?

Catering equips students with practical cooking skills as well as theoretical knowledge and understanding of the environment in which catering providers operate, how they operate, how they meet health and safety requirements, how food can cause ill health and how they can meet specific requirements of the catering industry, nutrition and healthy eating.

Students will be cooking a lot in Year 10 to prepare themselves for their exam and we recommend they provide their own ingredients or contribute to the cost of the ingredients. Students must bring a clean apron to every practical lesson and a container in which to carry home the products they make. Students will then undertake a series of theory lessons with no cooking to prepare for the written exam.

COMPUTER SCIENCE

Course Description

Beginning in September 2025, we are pleased to now offer GCSE Computer Science. This is a cutting edge GCSE taken by students who are passionate about the subject. It reflects the fast changing world in which we live and helps students develop the computational skills they need for an exciting digital future beyond the classroom.

It builds on the Key Stage 3 curriculum and covers the National Curriculum Programme of Study for Computer Science at Key Stage 4. It encourages students to think abstractly, procedurally and concurrently. The course is split into two intertwined sections; Computer Science Theory and Programming.

More details including the specification for GCSE Computer Science are available at [Computer Science \(2020\) | Pearson qualifications](#)

Assessment type

The Computer Science GCSE is examined by one 1 hour 30 minute written exam which assesses theory knowledge and one 2 hour practical (on screen) exam which assesses practical programming skills. Each of which is worth 50% of the final grade.

Computer Science is a subject but it's also a way of thinking: computer science students have been trained to think abstractly, procedurally and ahead. These are critical workplace skills and employers value the creativity and problem-solving skills of computer science.

Computer Science never stays still, and jobs that were unimaginable 20 years ago are now thriving, with so many opportunities available to work in areas as diverse as Cyber Security, Software engineering, biotechnology, drone technology, sustainable energy nanotechnology, smart devices and so much more.

Where Does it Lead?

GCSE Computer Science gives students a fantastic grounding in computer science. Success in computer science GCSE can provide access to AS/A2 computer science courses, including Cyber Security, Data Mining, Analytics, Financial Systems and so much more. In the long term, if students decide to pursue their computer scientific studies, it can lead to an almost limitless number of job opportunities. Highly qualified computer scientists are very much in demand and their skills are required in many jobs.

Please note: Students who select this option should be aware there will be an additional selection process based on maths and logic abilities, Attitude to Learning in Year 9 and an interview process with the Head of Computer Science.

HEALTH & SOCIAL CARE

Course Description

The Pearson BTEC Level 1/ Level 2 Tech Award in Health and Social Care is for learners who want to acquire sector-specific applied knowledge through vocational contexts by studying human lifespan development, health and social care services and values, and health and wellbeing as part of their Key Stage 4 learning. The qualification recognises the value of learning skills, knowledge and vocational attributes to complement GCSEs. The qualification will broaden learners' experience and understanding of the varied progression options available to them.

Why study Health & Social Care?

The Tech Award gives learners the opportunity to develop applied knowledge in the following areas:

- The life stages and key characteristics in the physical, intellectual, emotional and social (PIES) development classifications and the different factors that can affect an individual's growth and development .
- Different life events and how individuals can adapt or be supported through changes caused by life events.
- Health and social care conditions, how they can be managed by the individual and the different health and social care services that are available.
- The barriers and obstacles an individual may encounter and how these can be overcome.
- The skills, attributes and values required to give care and how these benefit the individual.
- How factors can affect an individual's current health and wellbeing.
- How physiological indicators and an individual's lifestyle choices determine physical health.

- The use of the person-centred approach.
- Recommendations and actions to improving health and wellbeing and the barriers or obstacles individuals may face when following recommendations and the support available to overcome.

Where Does it Lead?

Study of the qualification as part of Key Stage 4 learning will help learners to make more informed choices for further learning, either generally or in this sector. The choices that learners can make post-16 will depend on their overall level of attainment and their performance in the qualification. Learners who generally achieve at Level 2 across their Key Stage 4 learning might consider progression to:

- A Levels as preparation for entry to higher education in a range of subjects.
- Study of a vocational qualification at Level 3, such as a BTEC National in Health and Social Care, which prepares learners to enter employment or apprenticeships, or to move on to higher education by studying a degree in the health or social care sector.

Assessment type

3 mandatory units

1. Human lifespan development - internally assessed.
2. Health and social care services and values - internally assessed.
3. Health and wellbeing - externally assessed.

MUSIC

Course Description

In the BTEC Tech Award for Music there is a strong emphasis on performing and composing, **so playing an instrument or singing to a good standard is required, as well as the confidence to perform in front of an audience.** There is also an opportunity for use of music technology within the course and written work to evaluate, analyse and present.

There are 3 components.

Component 1 - Exploring Music Products and Styles. (internally assessed portfolio)

Students will learn to demonstrate an understanding of various styles of music ranging from classical to pop and rock and learning different techniques and features of each style.

Students will also learn to apply understanding of learned techniques to create music - this can be either a live performance, recording of a performance or creating an original composition.

Component 2 - Music Development. (internally assessed coursework)

Students will learn to demonstrate professional and commercial skills required to succeed in the music industry, auditing, planning and reviewing work through time management, organisation and maintaining a development plan.

Students will also apply the development process through practical workshops, performance, composition and music production.

Component 3 - Responding to a Brief. (external assessment)

Students will be set a task to apply their learned techniques and skills under supervised conditions after a short period of preparation.

Why Study Music

Music is a universal language studied around the world, bringing people together with a common interest and creating mixed communities. Learning an instrument and participating in music is proven to improve confidence, self esteem and the memory and raises cognitive achievement in all areas, also improving coordination and muscle memory.

Where Does it Lead?

Progression can lead to A level Music, Music Technology and higher BTEC diplomas in Music or the Performing Arts leading into an ever growing industry.

BTEC Performing Arts—Dance

DANCE

Course Description

The BTEC Performing Arts tech award course (Dance) is a creative option for students with an appreciation and passion for performing and choreography. The study of dance as an art form contributes to students' aesthetic and social development. As a physical activity it promotes fitness and well-being.

As choreographers, students use problem-solving and creativity skills and in directing others they develop their interpersonal and communication skills. Finally, as critics, students make informed decisions about the dances they review.

The course focuses on contemporary, street dance, jazz and musical theatre styles of dance. Students in certain styles will be expected to perform bare-foot.

Why study dance?

As well as improving their physical health, dance is good for students' mental health and teaches them skills such as problem solving, improvisation and communication.

Dance provides students with the space and platform to express themselves, they have the opportunity to choreograph and perform pieces that are valuable to them and the audience. These are sought after skills that are important for further study, careers and students' personal life.

Where Does it Lead?

Post-16 students can take BTEC Performing Arts (Dance) or A Level Dance, as well as further study continuing on to university and vocational colleges. Job opportunities include performing, teaching, choreography, dance critique, journalism, and sports and health related careers. The social, physical fitness and critical analysis skills developed during the course are useful for a range of careers and lifestyles and are valued by employers.

Assessment type

Component 1-Exploring the Performing Arts (assessed internally)

Learners will develop their understanding of the performing arts by examining practitioners' work and the processes used to create performance.

Component 2-Developing Skills and Techniques in the Performing Arts (assessed internally)

Learners will develop their performing arts skills and techniques through the reproduction of acting, dance and/or musical theatre repertoire as performers or designers.

Component 3-Responding to a Brief (assessed externally)

Learners will be given the opportunity to work as part of a group to contribute to a workshop performance as either a performer or designer in response to a given brief and stimulus.

GCSE Religious Studies

RELIGIOUS STUDIES

Course Description

The course will explore the practices and beliefs of the two largest religions in the world (Christianity and Islam). This is an opportunity to understand different points of view and address some of the big philosophical questions in life: Why are we here? How should we behave? What happens when we die? The course also looks at ethical topics such as crime and punishment.

Why study Religious Studies?

Religion plays a significant part in our increasingly interconnected world. Developing an understanding of different beliefs and values prepares young people to engage with the wider world when they leave school. The course has a strong emphasis on literacy and will help develop essay writing skills. Students will also learn how to form rational arguments about important moral decisions. The lessons will provide the chance for students to debate crucial issues, which is good for personal development.

Assessment type

GCSE (9-1) Two 1 hour 45 minute exams.

Where Does it Lead?

The course lays down solid foundations for the study of religion and philosophy at A level and then university. It also provides valuable knowledge and skills that can be applied in other A levels, in particular history and English. A GCSE in Religious Studies can be useful in a wide range of careers such as education, health care, the police and the media.

Course Description

The Pearson BTEC Level 1/Level 2 Tech Award in Travel and Tourism is for learners who want to acquire sector-specific applied knowledge through vocational contexts by studying the aims, products and services of different travel and tourism organisations, their use of consumer technologies, the features of tourist destinations, how organisations meet customer needs and preferences, and the influences on global travel and tourism as part of their Key Stage 4 learning. The qualification enables learners to develop their transferable skills, such as researching, planning, and making decisions and judgements.

The travel and tourism sector is the UK's third largest employer, accounting for 9.5% of total employment. Tourism is one of the fastest growing sectors in the UK in employment terms, employing nearly 3 million people, and the value of tourism to the UK economy is approximately £121 billion (7.1%) of UK GDP. In 2016, travel and tourism contributed 10.2% of the world GDP, and the sector now supports 292 million people in employment – that's one in ten jobs worldwide.

Assessment type

3 mandatory units

1. Travel and tourism organisations and destinations - internally assessed.
2. Customer needs in travel and tourism - internally assessed.
3. Influences on global travel and tourism.

Where Does it Lead?

The major career options (traditional career paths) in the travel and tourism sector are:

- Holiday/ travel agent.
- Tourism manager.
- Travel officer or travel agency coordinator.
- Travel counsellor or travel consultant.
- Airlines staff.
- Tourist guide.
- Transport officer.

Why study Travel & Tourism?

The Tech Award gives learners the opportunity to develop applied knowledge and understanding in a range of areas: The aims of travel and tourism organisations, how different organisations work together and types of travel and tourism, the features that make destinations appealing to visitors and different travel routes.

How organisations use market research to identify travel and tourism trends, and customer needs and preferences, and selection of products and services and planning a holiday to meet customer needs and preferences. Factors that may influence global travel and tourism, and how travel and tourism organisations and destinations respond to these factors, and the potential impacts of tourism on global destinations and how destinations can manage the impacts of tourism and control tourism
